

COAG-KLEEN FP FLOCCULANT POWDER FOR WATERBORNE PAINT

COAG-KLEEN FP

COURSE GRANULAR CONSISTENCY

BEFORE

WITH
COAG-KLEEN FP

COAG-KLEEN FP, flocculant, removes the absorbed waste paint solids from water that has been used to clean spray guns. The clean recovered water can be reused several times before disposal. The separated paint waste, when dry, is then disposed of in accordance with local regulations.

Benefits

- **Lower disposal costs since the water can be reused several times before disposal. Shop operation becomes "Greener".**
- Lower operating costs. Less flocculant used, at 2 scoops per 5 gal (20 L), compared to competitive flocculants.
- Uni-ram's COAG-KLEEN FP has a coarse granular consistency; very little powder goes airborne providing the operator with a clean air environment. Competitive brands are fine grain, messy to use and cause airborne contamination.

Packaging

- Part Number: 102-8300
- Container: HDPE plastic
- Weight: 2 Kg
- Pack: 4 containers per carton
- Dimensions: 8" h x 4.9" dia.
- State: Course Granular Powder

MSDS: Available on Uni-ram web site, www.uniram.com

To use, add two scoops of COAG-KLEEN FP powder per 5 gal (20 L) of spent water. Agitate for 5 minutes then drain through the Uni-ram COAG-KLEEN FP filter system.

Uni-ram's waterborne spray gun cleaners, UM120W and UG5000W clean spray guns **and** reclaim the spent water for reuse. These systems use the COAG-KLEEN FP filter system. The part numbers for the replacement filters are:

- 102-8125 Primary filter bag
- 102-8126 Secondary filter bag

AQUA-KLEEN PGC CLEANER FOR WATERBORNE SPRAY GUNS

AQUA-KLEEN PGC is used with a manual or automatic spray gun cleaner to effectively wash waterborne paint from spray guns.

Mix 1 container of AQUA-KLEEN PGC concentrate with 5 gal (20 L) of water.

Benefits

- Spray guns clean faster with AQUA-KLEEN PGC. The non-corrosive cleaning solution effectively cuts and dissolves paint **enhancing the cleaning power** of water and significantly reducing the cleaning effort.
- Productivity increases as the cleaning power of the AQUA-KLEEN PGC solution lasts much longer than water alone. Many shops effectively clean spray guns with the same solution for **3 months or more** before reclaiming or replacing the solution.
- When dirty the AQUA-KLEEN PGC solution can be reclaimed for reuse using Uni-ram's COAG-KLEEN FP flocculant powder and filter system.
- AQUA-KLEEN PGC is shipped as a concentrate not a solution; light weight and compact size results in lower freight costs.
- When mixed as directed, VOC content is 25 grams or less per L; thereby compliant with SCAQMD rule 102/ 1171 in California.
- Rust inhibiting

For Use in Uni-ram Gun Cleaners
- UM80W, UM120W, UA400W,
UG5000W, UG7500W.

Physical Properties

Part Number: 102-8200
Weight: 2.2 Kg
State: Liquid
Dimensions: 9" H x 3.5" dia.
Container: HDPE plastic
