

Ultimate Convenience and Performance

3M™ Platinum™ Plus Finishing Glaze is now available in a 30 oz. pump tube, allowing you to repair more jobs with the same great premium glaze you depend on from 3M. This all-surface glaze bites into galvanized steel, E-coat, metal, aluminum, fiberglass, SMC, cured epoxy, urethane and lacquer primers and cured or aged paint! Formulated with an adhesion promoter to offer the tightest grip to galvanized steel and aluminum. 3M™ Platinum™ Plus Finishing Glaze is self-leveling and flowable, excellent for skim-coating and offers good vertical hang.

Features and Benefits

- Superior adhesion
- Sands easily in 15 minutes
- Self-leveling
- Stain, tack & pinhole free

Surface Preparation

- Clean the damaged area with a quality wax and grease remover to remove all contaminants.
- Sand with 80/180-grit sandpaper if applying to bare metal or sand with 180-grit or finer if applying to surfaces other than bare metal.

Mixing

- Mix or shake before using. Use at room temperature. Place desired amount on a clean, non-porous surface such as a glass, metal or plastic mixing board.
- Add 1 1/4-inch (3.2 cm) strip cream hardener to a 3-inch (7.6 cm) diameter amount of Glaze. Mix thoroughly.

Application And Sanding

- Using a spreader or brush, apply a thin layer of material onto the area to be repaired. Maximum fill should not exceed 1/8-inch (3 mm).
- Sand the repair area in 15-20 minutes. Sand with 180-grit sandpaper and finer-grit paper (up to 400-grit) to featheredge.

Finishing

- Wait approximately 45 minutes and prime with a quality primer. Follow paint manufacturer's instructions for finishing.
