MOTOR GUARD INTRODUCES MAGNA STAKE ASSORTMENT

Economical Assortment of Stakes Fits all Brands of Plastic Hot Staplers

New from Motor Guard, an assortment of the Highest Quality stainless steel plastic repair stakes. Magna Stakes can be used to repair bumpers, fascias, spoilers, headlamp frames, interior molding, radiator brackets and any thermoplastic part using Motor Guard's Magna-Stitcher Products. The stakes can also be used with all competitive hot staple plastic repair systems. Magna Stakes are melted into the surface of the plastic resulting in a permanent repair of the crack. Repairs can be made on flat surfaces, tabs, holes, ribs, inside and outside corners.

Each Magna Stake Value Pack Contains:

- 100 - S Shaped Stakes for Flat Surface Repair
- 100 - M Shaped Stakes for Tabs and Narrow Sections
- 100 - V Shaped Stakes for Inside Corner Repair
- 100 - W Shaped Stakes for Outside Corner Repair

These precision stakes are made of the highest quality stainless steel for strong, corrosion-proof repairs. They are made to fit Motor Guard's Magna Stitcher line as well as all brands for plastic hot staplers.

The MS-2040 Value Pack is the latest addition to a full line of repair and refinishing products. From Pulling to Painting, Motor Guard Corporation has a product for all of your autobody repair and refinishing needs.
