

SCUFF STUFF PAINT PREP & RESTORATION

DESCRIPTION:

Scuff Stuff saves time and helps professionals abrade and clean with less effort. **Scuff Stuff** enhances coating adhesion by ensuring cleanliness and consistent surface profiling. This helps coatings spread flatter and bond more securely to the treated surface. Use **Scuff Stuff** to prepare blend and hard-to-reach areas. **Scuff Stuff** is ideal for cleaning and abrading urethane bumpers. Special abrasives will not cause swelling in blend areas.

DIRECTIONS:

Before using, knead or shake bottle to mix product and ease dispensing. Apply a 1" (25 mm) dab of **Scuff Stuff** to a 2'x 2' (.6m x .6m) section and spread with a scuff pad, rubbing in a crisscross pattern until an even matte finish is obtained. For areas around trim or under seals, apply a dab to a clean, cotton cloth and gently rub area. When treatment is complete, rinse surface with fresh tap water by sponge or hose and wipe or blow dry. Make sure all residue is gone in hard-to-reach areas.

FEATURES & BENEFITS:

- Ensures paint adhesion in blend and hard-to-reach areas
- Removes waxes, sealers, road film and soils from auto finishes
- Does not cause scratch-swelling in blend areas
- Rinses away completely
- Reduces panel and vehicle prep time
- Helps prep plastic bumpers

PACKAGE SIZES:

Quarts	Part # 131732
3.0kg. (6.6lb)	Part # 131730
