

# THE TAP PAIL

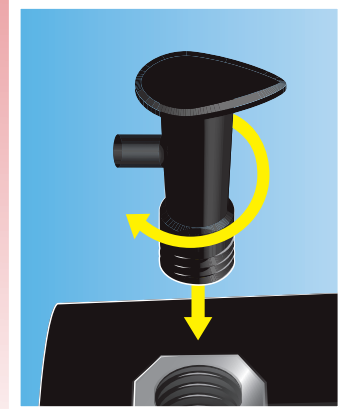

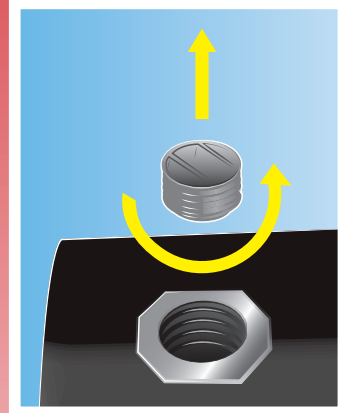

**FASTER AND SAFER  
THAN POURING**

- Reduced spillage
- Safer handling
- Saves Money

COVERED BY  
US PATENT  
APPLICATION  
62/330470 &  
62/341862

Lay drum on side when removing plug or tap as to not spill contents.

The insertion of a tap in the side of *the TAP PAIL* allows for a safe and efficient dispensing of pail contents. Competitive pails do not have this advantage and require pouring or a hand pumping process which is inefficient and an unsafe procedure for the dispensing of liquids.

***3/4" Tap  
Sold Separately***

**U.S. 26422**  
1 each / 12 per case
