FILM

Patented SynWave™ Technology

Proven to Reduce Finish-Sanding Time by up to 50%*

Exclusive to USC Abrasives, SynWave™ Technology is a patented scalloped-edge design that enables simultaneous sanding of flat and curved surfaces without the risk of gouging. It's part of the ORION™ Advanced Film Technology product line, a **premium bright-orange film that takes automotive sanding to a whole new level!**

P3000

ORION
Advanced Film Technology
WARNING: Wear proper eye, face and body protection.

- Patented design sands flat and curved surfaces without gouging
- Durable, polyester film backing
- Micro-precise grains improve cut speed and finish
- Advanced resin-over-resin design
- Proprietary anti-clog technology
