WIZARDS DATA SHEET • COMPLETE PRODUCT INFORMATION

AUTOMOTIVE

21mm stroke/throw - Includes 6" Backing Plate and Tote Bag
Part No. DAP0121
4/case
Net Wt. 32 lbs.

DETAILING • CLEANING • PROTECTION

DESCRIPTION:

THE WIZARD 21™ BIG THROW POLISHER is a dual action orbital polisher with a very effective 21mm stroke. This action of over ¾ inch (0.83") dwarfs all traditional orbital polishers with up to six times more pad-to-surface movement. This sleek ergonomic design with a balanced and powerful drive provides a faster, safer, and more productive way to address paint correction, remove swirls and achieve that perfect paint finish.

BENEFITS:

THE WIZARD 21™ BIG THROW POLISHER is a professional machine that can be used with minimal skill to produce perfect swirl-free results every time. Scratch and swirl removal is now available to the average car enthusiast without the fear of burning, damaging or destroying their custom paint finish.

Detail professionals can benefit by saving time generated by the use of a more effective system. Body shop professionals can save money by delegating the finishing step of buffing out a car to a beginner with little experience, and still deliver a vehicle without damage, swirls or customer comebacks.

FEATURES:

- Huge 21 mm Orbit with Dual Action
- Ergonomic Sleek Design
- EZ Start /No Delay Trigger
- Lightweight, only 6 lbs
- Constant Torque /Speed Control
- 1-6 Speed Dial
- 2000 to 4200 OPM
- Durable 12' Cord
- Includes 6" Backing Plate /5" Optional
- Includes Wizards Tote Bag

HOW TO USE:

Guaranteed Results when used with SSR Kit #99121. This "Scratch & Swirl Removal" Kit includes 8 oz. Mystic Cut™ Compound, 8 oz. Mystic Nano Wax™, 6" Microfiber Cutting Pad, 6" Polishing Pad, 6" Wax Pad, and a Pad Conditioning Brush.

1) Apply MYSTIC CUT™ generously to full face of WIZARDS® BLACK MICROFIBER CUTTING PAD #11601. Hold pad flat to surface and spread across a 2'x2' section using light pressure with 3-4 slow passes overlapping by 75%, run speed dial from 4-6. Add product as necessary if it becomes dry to surface.

2) Repeat step #1 using WIZARDS® ORANGE POLISHING PAD #11603 and MYSTIC CUT™.

3) Wipe away all residues and inspect, continue as needed, applying only drops of product once pad is wet.

4) Starting with all previous residue removed, apply MYSTIC NANO WAX™ to WIZARDS® GRAY WAX PAD #11605; this does not require as much product on the pad as the compound step. Spread out across a 2'x2' section and overlap making several passes, run speed dial from 4-5.

5) Wipe any light residue from paint with a clean microfiber cloth.
